Education

Silicon University, B.Tech in Electronics and Communication

Aug 2019 - July 2023

- GPA: 8.1/10.0
- **Coursework:** Data Structures, Operating System, Computer Networks, Database Management

Experience

Senior Software Engineer, Cozentus Technologies

June 2025 - Present

- developed a web microservices based tool for managing delivery orders and book them for shipping saving significant cost and time for the customer.
(Python, Django, Azure, Azure App Service, Azure Function App, Azure Storage Account, MSSQL, Azure Devops, Git)
- developed a microservice based scalable **IDP(Intelligent Document Processing)** application to extract structured data from logistics documents reducing manual processing by **90%**
(Python, Django, Azure, MSSQL, MongoDB, Redis, Git, Gen-AI, OCR, Langchain, Data Structures, OPENAI, GEMINI, Google Document AI)

Software Engineer, Cozentus Technologies

June 2023 - Jun 2025

- developed an **Generative AI** powered analytics assistant converting natural language queries to interactive charts and cards.
(Python, Langchain, SQL, OPENAI)
- developed a Document RAG for an application to develop the **Ask Help** feature
(Python, Langchain, GEMINI, Vector, Embeddings, Semantic Chunk, FAISS, PineCone)
- developed a rule-based price engine to compute shipment cost based on parameters like(weight, mode etc.)
(Python, FastAPI, PostgreSQL, Excel)
- developed a **ML** based predictive ticket supporting tools that improved resource allocation by 75%.
(Python, Machine Learning, EDA, XgBoost, Prophet, Time Series, Pandas, Numpy, Matplotlib, Excel)

Software Engineer Intern, Cozentus Technologies

Jan 2023 – Jun 2023

- Developed an **ETL** service to extract data from different applications transform them and load into a single database.(python, JSON, Snowflake DB)
- Built an app to compute the similarity of all methods in a codebase, reducing the time from $\mathcal{O}(n^2)$ to $\mathcal{O}(n \log n)$
- Developed a **python** script to scrap global news data to be used to analyze risk involved in a shipment
(Python, Selenium, Web Scrapping).
- Designed **POWER BI** Dashboard with proper KPIs

Projects

VendorFinder Product

github.com/name/repo

- Developing a mobile application for users to find out if their favorite vendors have come.
- Tools/Technologies Used: **Python, Django, Azure, DigitalOcean, MSSQL, React-Native**

Shell Script for Cloud Resources

github.com

- Developed a Shell Script to monitor vm instances.
- Tools/Technologies Used: **Shell, bash, Linux**

Technologies

Languages: Python, Java, SQL, C++ , HTML/CSS, Javascript

Cloud Azure, AWS, DigitalOcean

Technologies/Frameworks: Github, Langchain, Linux, Docker, ETL, Artificial Intelligence, OOPS, System Design

Developer Tools: VS Code, Pycharm, DBeaver, SSMS, Jupyter Notebook, Google Colab, AWS Lambda

Languages

English

Hindi
